1) Energy efficiency class "X" on a scale from D (least efficient) to A+++ (most efficient).

2) Energy consumption "X" kWh per year, based on 280 standard cleaning cycles using cold water fill and the consumption of the low power modes. Actual energy consumption will depend on how the appliance is used.

3) Water consumption "X" litres per year, based on 280 standard cleaning cycles. Actual water consumption will depend on how the appliance is used.

4) Drying efficiency class "X" on a scale from G (least efficient) to A (most efficient).

5) Eco 50 is the standard cleaning cycle to which the information in the label and the fiche relates. This programme is suitable to clean normally soiled tableware, and it is the most efficient programme in terms of combined energy and water consumption.
